# Declaration of Original Work

My name is Gad Niyibigira.

Course: SWE 3409 - Mobile Application Development
Assignment: Individual Assignment 2
Institution: INES-Ruhengeri
Registration number: 25/26951
Verification code: MOB-A2-6951

I declare that this assignment is my own work. The GadPortfolio Android application, its source code, its user interface design, and the accompanying documentation were designed and produced by me.

I confirm the following:

1. The application was built with React Native, Expo, and TypeScript by me.
2. The APK was produced with EAS Build and installed on my own device (Samsung Galaxy A04e, Android 14) for testing.
3. The eight test cases in the test log were performed by me on the installed APK. The results recorded are accurate and were not edited after the fact.
4. The two project descriptions in the application (Student Management System and Milk Check) describe work I personally contributed to. They do not claim features I did not implement.
5. I used AI assistance for parts of this project. My use of AI is fully disclosed in evidence/AI_USE.md and was limited to code scaffolding, review, and documentation drafting. I reviewed, tested, and take responsibility for every line of code in the final application.
6. I have not copied another student's work, and I have not allowed anyone else to copy mine.

Signed: Gad Niyibigira
